

HUMAN INTELLIGENCE (HlaaS) AS A SERVICE

HlaaS Mechanisms

- 🌐 Deploy former CIA case officers to collect critical intelligence in support of **specific desired results**.
- 🌐 Implement advocacy strategies to **dramatically increase local support** for your global investments.
- 🌐 Task a fleet of **local resources** to deliver surveys, photos, and mobile metadata within 48 hours.
- 🌐 Access intelligence **sourced from illicit online communities** in native or translated formats.

Who is FRDA?

FRDA has provided sensitive services to US Defense and Intelligence clients for over 20 years. Our commercial practice offers the same boutique services for select clients. With over 50 experts deployed to 18 countries today, we continually prove our effectiveness. Our employees have business, Intelligence, and Special Operations backgrounds, with decades of experience solving the most pressing national security problems.

Non-Attributable Option

If requested, FRDA can conduct all activities in a manner that is not attributable to our clients. We have deep experience managing sensitive operations in international settings. FRDA was forged from a no-fail culture, expert in low-visibility and discreet assignments.

Predictive Intelligence

FRDA delivers competitive and risk reduction intelligence only available through human collection and analysis; providing critical strategic decision-making data.

Use cases: Global M&A, Product Development, Market Penetration, Security Posturing

Counterintelligence

Embed an FRDA employee to boost counterintelligence and insider threat detection. Build internal human networks to detect insider and external threats.

Use cases: Government Intrusion, Intellectual Property Theft, Corporate Espionage Defense, Insider Threat

Strategic Advocacy

Establish and manage advocacy campaigns resulting in increased market share in frontier markets. Safeguard desired outcomes and protect investments through media and local human network support.

Use cases: Market Share Loss, Public Perception Concerns, Competitor Growth, Government Interference

Internal Intelligence Practice

Utilize FRDA Mentors to guide you through creating your own in-house intelligence practice.

Use cases: Foreign Government Interference, M&A Cycles, Highly Competitive Environments
